

TILE BATTENS

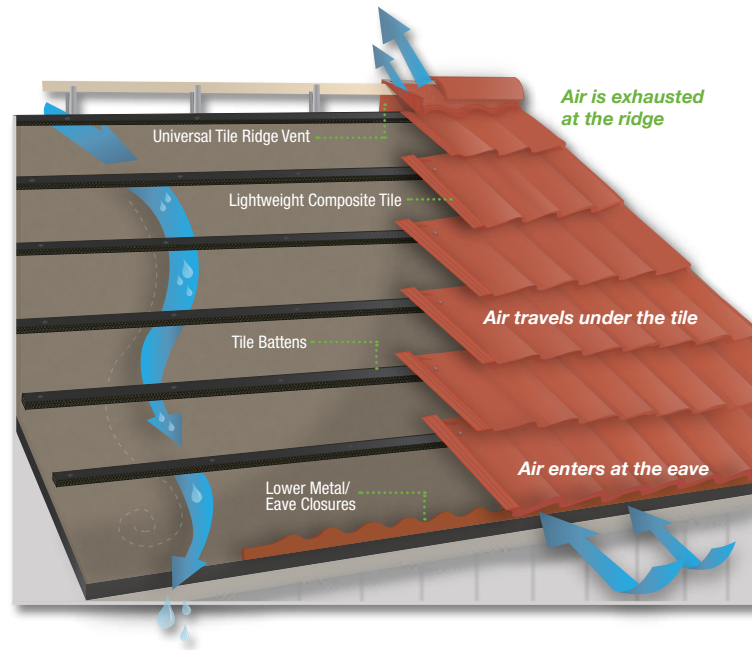

Overview

Quarrix Tile Battens are made of durable HDPE corrugated plastic, providing long-term superior performance for tile and wood roof applications. Tile Battens prevent the damaging effects of moisture build-up by allowing water to drain freely underneath tiles, and air to move freely, keeping the roof deck properly ventilated.

Quarrix Tile Battens Benefits

- Proven Performance**
 Highly rigid design dimensionally die cut for identical pieces and plastic design creates a gasket effect which eliminates leaking around fasteners.
- Unmatched Versatility**
 Eliminates the need for lath and counter batten system.
- System Solution**
 Works with tile or wood to create a drainage plane and allows continuous airflow underneath the roof.
- Industry Standard**
 Quarrix Building Products is the leading manufacturer of corrugated HDPE ventilation products.
