

QUARRIX RIDGE VENT

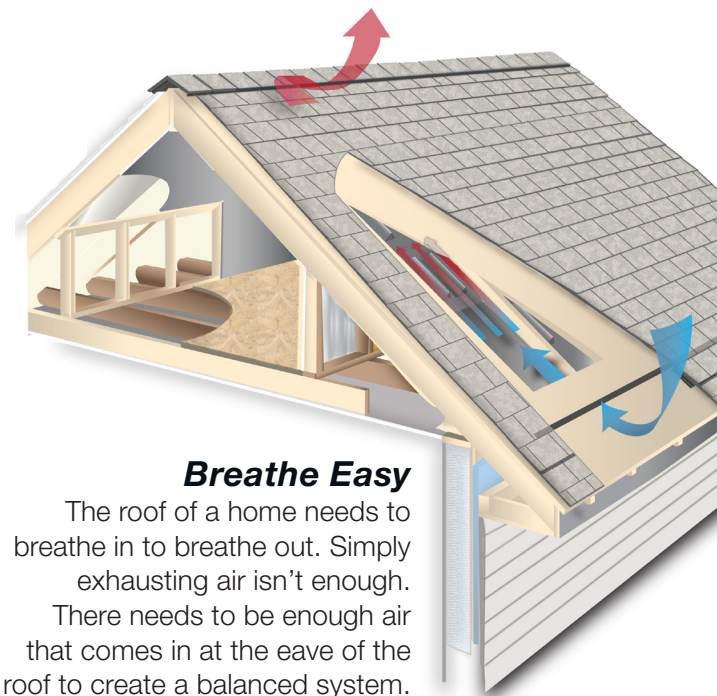

Overview

Quarrix Ridge Vent is the most versatile roof ventilation product on the market. It works with a wide range of roofing materials and installs on the hip and ridge for a clean appearance. Quarrix Ridge Vent helps keep attics cool and allows hot, moist air to release at the highest point, which is essential to achieving a balanced ventilation system. The StormStop® Membrane allows air to flow while preventing all forms of weather from entering the attic space. Quarrix Ridge Vent is available in 4' Sections or 20' Rolls.

Quarrix Ridge Vent Benefits

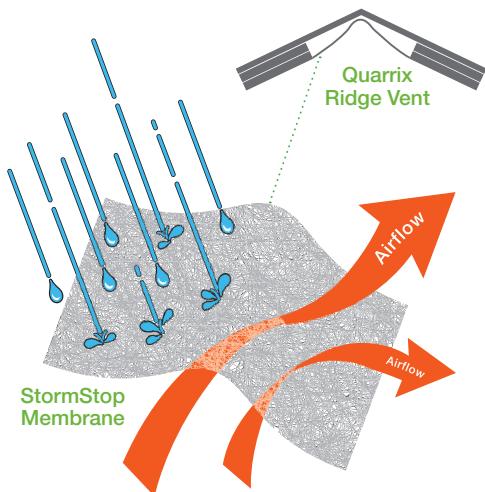

- **Proven Performance**
Fully tested and certified with virtually no failure rate.
- **Curb Appeal**
Clean, even ridge line enhances the image of the home.
- **Unmatched Versatility**
Efficiently installs with a wide range of roofing materials on both the hip and ridge.
- **Industry Standard**
Quarrix Building Products leads the rolled ridge vent market.

Breathe Easy

The roof of a home needs to breathe in to breathe out. Simply exhausting air isn't enough. There needs to be enough air that comes in at the eave of the roof to create a balanced system. Breathe easy knowing Quarrix roof ventilation ensures the proper ratio of intake and exhaust and has proven performance to extend the life of the roof.

StormStop® Membrane

In extreme weather conditions, the spun-bound material of the StormStop Membrane protects the attic and keeps moisture out while allowing continuous airflow. StormStop is engineered so that moisture simply beads up and runs off to protect the attic space.

QUARRIX RIDGE VENT SPECIFICATIONS

Ridge Vent 20' Rolls

Part #	Width	Height	Certified N.F.A	Pitches	Warranty	Material
